**FOR IMMEDIATE RELEASE** -- MILL VALLEY CA February 4, 2009 – CAN DO KID today announced an expanded voluntary recall of bars that contain peanut butter because the products have the potential to be contaminated with Salmonella. The recalled products contain peanut butter manufactured by Peanut Corporation of America (PCA). PCA is the focus of an investigation by the U.S. Food and Drug Administration (FDA) concerning a recent Salmonella outbreak thought to be caused by tainted peanut butter. There have been no reported illnesses from these products as they are thoroughly tested for salmonella prior to leaving our manufacturing partner. We are being very cautious and complying with our manufacturer's recommendations. *Salmonella is an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with Salmonella often experience fever, diarrhea (which may be bloody), nausea, vomiting and abdominal pain. In rare circumstances, infection with Salmonella can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections (i.e., infected aneurysms), endocarditis and arthritis.*

The following CAN DO KID products with "Best By/Sell By" dates ranging as shown below, in all sizes and packages, are included in the recall. *Please note that only the bars with the lot numbers(best by) numbers below are affected.*
